### Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

### Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Executive Order N-33-20**

On 03/19/20, the California State Public Health Officer and Director of the California Department of Public Health ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain Continuity of Operations of the Federal critical infrastructure sectors.

- **Global Health Advisory**

On 03/19/20, the U.S. Department of State issued a Global Health Advisory at Level 4 (Do Not Travel) due to the global impact of COVID-19.

- **FEMA-4482-DR-CA**

On 03/22/20, President Trump approved Major Declarations FEMA-4482-DR-CA (DR-4482) for the COVID-19 Pandemic.

### **Confirmed Global COVID-19 Cases – Per Worldometers COVID-19 Live Updates as of 10/01/20 at 1000 hours:**

- 34,323,308 (+335,707) total confirmed cases in 213 countries
- 1,021,163 (+6,233) total deaths

### **Confirmed United States COVID-19 Case – Per Centers for Disease Control and Prevention (CDC) as of 10/01/20 at 1100 hours:**

- 7,213,419 (+45,342) total confirmed cases
- 206,402 (+1,030) total deaths

### **Confirmed California COVID-19 Cases - Per Medical Health Coordination Center as of 10/01/20 at 1100 hours:**

- 813,687 (+3,062) total confirmed cases

- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details.

## Earthquake Swarm, Westmoreland, Imperial County, 09/30/20

On Wednesday, 09/30/20, a series of earthquakes began at approximately 1500 hours near the city of Westmoreland located south of the Salton Sea, Imperial County.

- As of 10/01/20 at 1705 hours, there have been a total of 313 M2.0 and higher earthquakes with the largest being a M4.9.
  - The earthquake swarm magnitudes breakdown as follows:
    - M4.0 – M4.9: 7
    - M3.0 - M3.9: 65
    - M2.0 – M2.9: 241
- The following three scenarios describe possibilities of what could happen from 10/01/20 to 10/08/20. Only one of these scenarios will occur within the next week. These scenarios include the possibility of earthquakes on and off the Imperial and San Andreas Faults.
- Scenario One (Most likely: 90%): Earthquakes continue, possibly including earthquakes up to magnitude 5.4. The most likely scenario is that the rate of earthquakes in the swarm will decrease over the next 7 days. Some additional moderately sized earthquakes (M4.5 to 5.4) may occur, which could cause localized damage, particularly in weak structures. Smaller magnitude earthquakes (M3.0+) may be felt by people close to the epicenters.
- Scenario Two (Less likely: 10%): A larger earthquake (magnitude 5.5 to 6.9) could occur within the next 7 days. A less likely scenario is a somewhat larger earthquake could occur (up to a M6.9). Earthquakes of this size could cause damage around the area close to the earthquakes that have already occurred and would be followed by aftershocks that would increase the number of smaller earthquakes per day. This scenario occurred in a previous swarm in the area – in 1981, when a swarm in this region included a magnitude 5.8 earthquake.
- Scenario Three (Least Likely: approximately 1 in 300): A much larger earthquake (magnitude 7 or higher) could occur within the next 7 days. A much less likely scenario, compared with the previous two scenarios, is that the ongoing swarm could trigger an earthquake significantly larger than the M4.9 that occurred on 09/30/20 (i.e., M7.0 and above). While this is a very small probability, if such an earthquake were to occur, it would have serious impacts on communities nearby and would be followed by aftershocks that would increase the number of smaller earthquakes per day.
- The EQTP Duty Officer will continue to monitor and provide updates as warranted.

# **WEATHER OF CONCERN**

## **NORTHERN CALIFORNIA**

- North-northwest winds are forecast to gust up to 25 mph across portions of southern Mendocino county and western/southern Lake county through Friday evening. In addition, hot afternoon temperatures will favor humidity values in the teens. Those conditions combined with dry vegetation will support a critical fire weather threat.
- A Red Flag Warning has been issued through 0600 hours Saturday for the Los Padres National Forest above 1,000 feet, and specifically the Dolan Fire. Winds are expected to increase from the north from 10 to 20 mph, with gusts from 25-30. Critical fire conditions are forecast with dry humidity values through the event, with drier conditions possible overnight with poor humidity recovery expected.
- A Red Flag Warning has been issued through 0600 hours Saturday for the North Bay Mountains above 1,000 feet, and specifically the Glass Fire, the East Bay Hills, and the Santa Cruz Mountains. Winds are expected to increase from the northwest from 10 to 20 mph, with gusts from 20 to 30 mph.

## **SOUTHERN CALIFORNIA**

- Excessive Heat Warning in effect until 2000 hours Friday for portions of San Diego County Valleys, Santa Monica Mountains, Ventura County Interior Valleys, Ventura County, Coastal Valleys, San Fernando Valley and San Gabriel Valley.

# **WEATHER KEY POINTS**

**10/01/20 - 10/07/20**

## **Thursday-Friday**

- Moderate to locally High heat related health impacts continue across southern and central CA, with triple digit temperatures for many valley areas, and even 90s for some coastal areas.
  - Much above normal temperatures statewide, with record high temperatures possible Thursday.
- Elevated to locally critical fire weather concerns continue.
  - North to northwest winds with gusts up to 25-30 mph and poor overnight relative humidity recovery through Friday afternoon for the portions of central CA, especially near the Dolan and Glass fires.
  - Weak offshore winds with gusts of 20-25 mph, and poor overnight relative humidity recovery will continue over southern California
- Areas of poor air quality and smoke continue.

## **Saturday-Wednesday**

- Some slight relief to the heat expected into the weekend, with more onshore flow expected which should return temperatures closer to seasonal normal into early next week
- Elevated fire weather concerns continue with dry and warm conditions but lighter winds.
- Areas of poor air quality and smoke continue.
